

## How it works

Multi-sites & Multi-devices

UCM simplifies the configuration, management and administration of **CRIME-SEEN™** CS systems in Ethernet networks.

UCM automatically searches for any **CRIME-SEEN™** CS systems connected to the network. It differentiates between transmitters and receivers, and depicts them with their IP address and current connection status. New IP addresses can be automatically allocated from a predefined Product ID pool in DNS server.

## System Requirements

Multi-sites & Multi-devices

- PC Pentium4 1.6GHz or higher
- Min 64MB RAM
- Windows 98/NT/200/2003/XP
- Graphic card with PCI bus or AGP and more than 32MB Memory
- Ethernet card

## Applications

Multi-sites & Multi-devices

- Facility management systems
- Audiovisual Information Center
- Retail
- Parking garage
- Access control systems
- Construction sites
- Public security
- Medical applications
- Alarm call centers
- Security service providers
- Banking
- Casinos, Gambling
- Factory automation
- Stock Rooms
- Tourism

## Why UCM

Multi-sites & Multi-devices

UCM allows a central operator to select the desired number of devices up to 32 channels from a list and carries out the upload. Creating a connection from the various kinds of network transmitters of CS systems is done simply by "Server Registration".

The central operator enables monitoring and recording the audiovisual signals from any of CS systems, CS-DVR BX, CS-DVR LT, CS-XDVR BX, CS-XDVR SD, CS-XWEB & CS-KWEB, in different locations.

## UCM Software

Multi-sites & Multi-devices

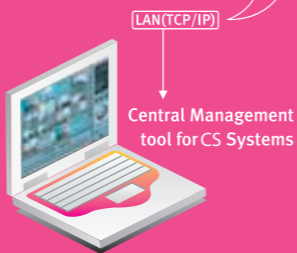

- Universal management tool for the administration of CS systems in Ethernet networks.(TCP/IP)
- Automatic detection of CS system units in the network and display of connection status.
- Automatic detection of IP addresses, based on a predefined Product ID.
- Display of basic parameters (IP and Product ID, hardware and software version.)
- Multicast connection of one transmitter and several receivers.
- Enable recording up to 32 cameras in 32 locations.
- Simultaneous access to multi-sites in multi-devices.

# UNIVERSAL CENTRAL MONITORING

## MONITORING Functions

- Supports 32 sites simultaneously remote connection
- Live monitoring and recording up to 32 channels
- Live audio monitoring and recording selected for each channel
- Bi-directional audio communication
- Remote PTZ control
- Supports 1, 4, 8, 9, 10, 13 and 16 screen divisions with Group A and B pages

## Recording Functions

- Recording the video to local hard disk when an event occurs
- Pre-alarm and post-alarm recording
- Motion detection recording
- Schedule recording
- HDD recycle feature, allowing non-stop recording

## Search Functions

- Search by channel, date and time
- Digital Zoom for detail recognitions
- AVI Conversion
- Still Capture to JPEG and BMP format
- Panorama viewing for detail search

# UNIVERSAL CENTRAL MANAGEMENT PROGRAM

The only way to simultaneously access our network devices in different locations at the same time.

With our **CRIME-SEEN™** Universal Central Monitoring (UCM) program, users can communicate and interact with different kinds of **CRIME-SEEN™** digitalized models such as USB DVRs, DVR Cards and Web Camera systems together into an integrated interface, and allows the user to manage several systems from one central point of control.

## UCM Software

**Multi-sites & Multi-devices**  
**Universal Central Management**  
**software for CS Systems**

**The World is in my hand with UCM!**

### Features

- Supports up to 32 sites simultaneous remote connection
- Live monitoring and recording up to 32 channels
- Live audio monitoring and recording for the selected channel
- Bi - directional audio communication
- Remote PTZ control
- Screen divisions with group A and group B pages.
